

## **Cybersecurity Projects**

### **Google Cybersecurity Certificate Project**

- Conducted a simulated risk assessment and vulnerability analysis for a fictional organization.
- Developed and implemented security policies to mitigate identified risks.
- Created incident response plans to address potential cyber threats.

### **ISC2 Certified in Cybersecurity (CC) Training**

- Gained foundational knowledge in security principles, access controls, and network security.
- Learned to identify and respond to security incidents, ensuring system and data protection.
